Plus, replacing your brake fluid is ...

transfer the fluid out of the caliper

remove your reservoir cap and of course brake fluid

wipe any drips or spills off of the paint

remove this little dust cover off of the bleeder valve

loop the hose up

working on the right caliper

remove the master cylinder

apply some tri-flow or penetrating oil to the top

check the fluid level

pump all the old fluid with its air bubbles

pull the brake lever a few times

crack the bleeder

close the bleeder valve

punch two holes in the foil

add fluid to the reservoir

pull it down below the height of the caliper

bleeding the opposite side caliper

check the master cylinder one last time

wipe off the master cylinder

wipe all the residue off
