Intro

Welcome to this interview training tutorial.

In very simple terms, the supply chain is a system that involves organizations, people, resources, activities and information that are all involved in the process of moving a product or service from the supplier to the customer.

That's a good question! The one thing I like the most about working in supply chain is the fact you get to work with so many different companies, people and organizations to build up long-term, positive relationships that everyone can benefit from

Here We Are Talking about the Ability of a Company in this Case To Get Back to the Same Level of Manufacturing Level of Service Whatever Criteria You Have after Being Hit with some Type of Disruption so One Way To Do It Is To Create Redundancy To Have More Stuff than You Need You Have More Safety Stock Just Stock Lying Around You're Saving Cars You're Sending Them You Know a Lot of Cars Are around a Dealer's Lot Just in Case Have You no Extra Manufacturing Plant Have Extra Capacity More than You Need There's One Little Problem with this You CanNot Stay in Business

Think about What It Does for Reward for Recalls Did about the Cost down the Line on the Other Hand by Comparison Honda Accord Which Sells 10 Times More than the Mercedes E-Class There's Only 529 Combination this in Color Engines You Know Packages Whatever Means It's Not Easier To Maintain and that Easier To Respond to all Kind of Unexpected Disruptions I'M Not Going To Talk Too Much about this Ups Gets a Lot of Its Flexibility from the Cross-Training of Its People Finally Let Me Just Say the Supply Test Structure Itself Can Create Resilience or the Ability To Respond to all Kind of Disruption
